

General Motors Engine Performance Training (1996-2008)

The push for better performance and lower emissions has resulted in some complex new technologies on General Motors vehicles. Attend this seminar to learn from our concise system explanations and unique testing procedures for these new systems, as well as many *new* diagnostic strategies for testing systems back to 1996.

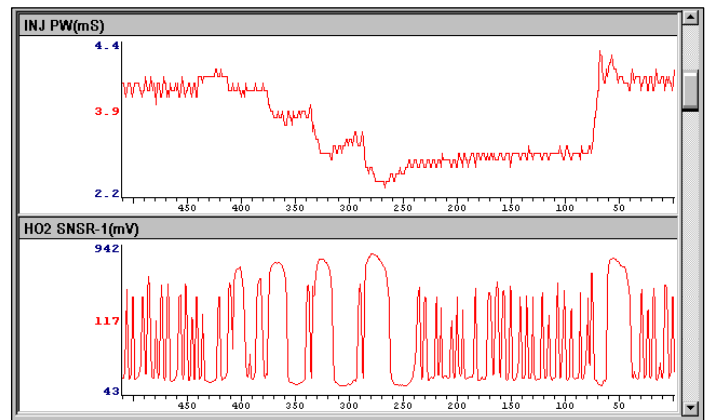

Attendees receive an all-new General Motors Training Manual, which includes repair information,

tips, and testing examples. This new GM Engine Performance class covers all engine management systems, but has expanded sections on the following troublesome topics and unique new systems:

- Displacement On Demand
- Direct Injection (2,500 psi!)
- Controller Area Network (CAN)
- Variable Camshaft Timing Systems
- Multiple Drive-By-Wire Variations
- All Ignition & Fuel Systems
- Enhanced EVAP, Misfire, Fuel Trim, & EGR

This is the time to catch up on the latest GM changes, with tips and fixes from our talented instructors. We've included hundreds of live Scan Tool, Lab Scope, and Graphing Multimeter captures from known good and faulty systems.

EVAP Purge Verification Example

SEMINAR INFORMATION Code: 2008060926

DATE: Monday, June 9, 2008
Tuesday, June 10, 2008

TIME: 6:30 pm - 10:00 pm each night
